## HAIRSTYLE VERSIONS IN FINGER WAVING

Side Part finger wave with fluff nape line.

Swirl Back effect finger wave with tapered neck line.

Horse Shoe effect finger wave.

## VERTICAL FINGER WAVING

Vertical finger waving is different from the horizontal in this respect: the ridges and waves run up and down on the head, while the horizontal go parallel around the head.

Procedure for making ridges and waves is the same as for horizontal finger waving.

Make side part extending from forehead to crown. Form shaping in a semi-circular effect. Figs. 1 and 2. Then make first section of ridge and wave. Fig. 3. Continue with additional sections until the part is reached.

Start the second ridge at the hair part. The third ridge is started at the hairline. Completed side is shown on Fig. 4.

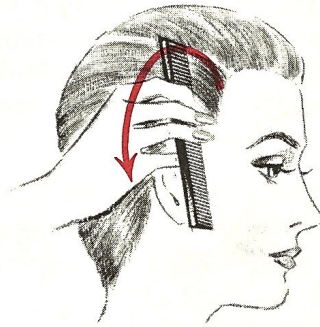

Fig. 2.

Fig. 3.

Fig. 4.

## REMINDERS AND HINTS ON FINGER WAVING

1. When preparing to give a finger wave, wash hands and have available sanitized implements and clean supplies.
2. Avoid the use of an excessive amount of waving lotion. A good waving lotion is not harmful to the hair.
3. For finger waving, use hard rubber combs having both fine and coarse teeth.
